Project Advisory

- ❖ Programme Setup
- ❖ Strategy formulation and planning
- ❖ Digital transformation
- ❖ Project bid management
- ❖ Project Controls
- ❖ Risk management
- ❖ EOT & Delay analysis
- ❖ Claims & Arbitration support

Project Management

- ❖ Design review & validation
- ❖ Interface Management
- ❖ Planning & scheduling
- ❖ Contract administration
- ❖ Cost control
- ❖ Site supervision
- ❖ Site inspections & audits
- ❖ MIS Reporting
- ❖ Document Management

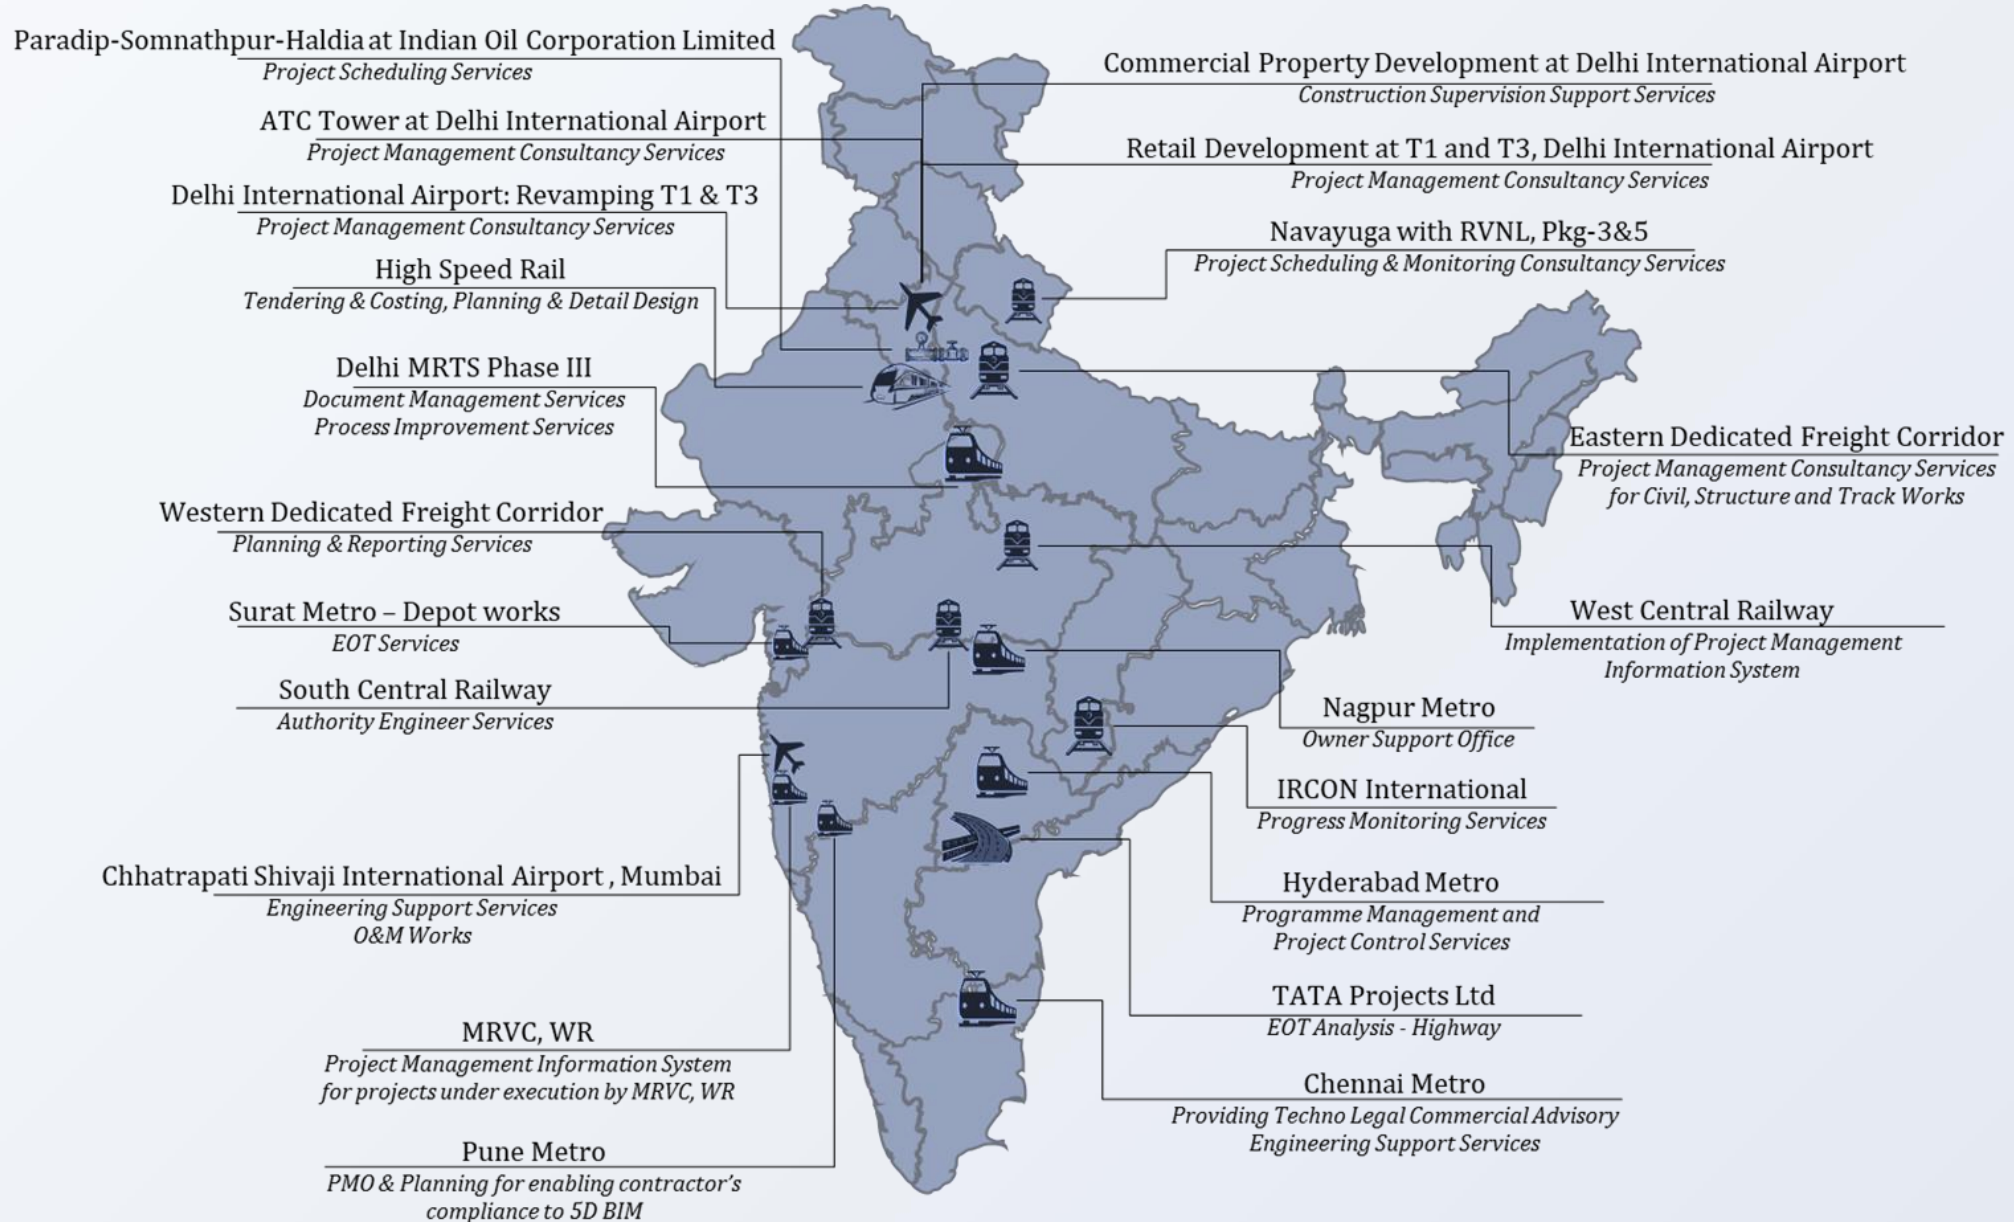

Digital Solutions

- ❖ In-House Project Management Information System
- ❖ Document Management Services
- ❖ E-Billing & RFI Solutions
- ❖ BIM Support
- ❖ Project Web & Mobile Applications

PMIS Solution Overview

Integrated, Data-Driven, Scalable Project Management System

Central Repository

All project data in one place

✓ Active

✓ Single source of truth

Unified data across packages

100% data consolidation

L5/L6 Planning

Day-to-day monitoring

✓ Active

✓ Site progress tracking

Bottleneck mitigation

Real-time visibility

Productivity Forecasting

Completion date estimates

✓ Active

✓ Structure-wise tracking

Avg. & max productivity rates

95% accuracy

Digital RFI

Quality & safety records management

✓ Digital workflow

✓ Active

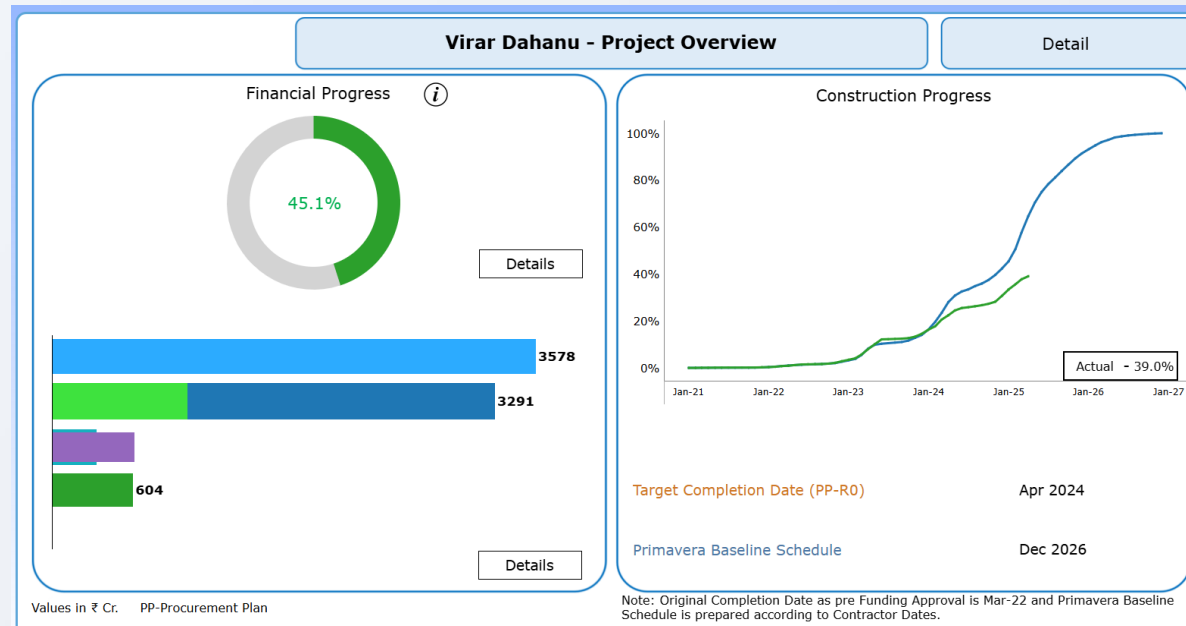

Delay Analysis

Linked with P6 for EOT forecasting

✓ P6 integration

✓ Active

AI Insights

Search, analyze & summarize data

✓ Smart analytics

✓ Active

Budget Planning

System-generated analytics

✓ Cost optimization

✓ Active

Key Features of PMIS

Comprehensive project management capabilities

12 Core Features

 Planning & Scheduling Integrated with Primavera P6 for detailed project planning	 Dashboards & Reports Executive and package-level insights	 Digital RFI System Field inspections & QA/QC management	 AI Document Storage SynTrack Intelligence for data search
 4D BIM Integration Integrated with Bentley tools	 Weighted Metrics Patented monitoring system	 Field Mobile App Cross-platform field data capture	 AI Analytics Performance analysis & insights
 ERP Integration RESTful APIs for seamless data flow	 Quality Control Digital QA/QC management	 Progress Tracking Real-time progress monitoring	 Risk Management Risk assessment & mitigation

 All features are fully integrated with the PMIS platform

 Ready to deploy  Scalable solution

AI & Advanced Analytics

From Data to Decisions - Intelligent Project Management

Search Data

Rapid retrieval across project data

✓ Active

Trained AI models for rapid search

Search through contracts, RFIs, drawings, site reports

Response time: <2 seconds

Analyze Data

Bottleneck identification & insights

✓ Active

Deep analysis uncovers hidden patterns

Identify bottlenecks and performance trends

Accuracy: 98%

Summarize Data

Auto-generate actionable reports

✓ Active

Automated summarization

Condense complex data into clear reports

Report generation: <1 minute

4D BIM Integration

Plan, Visualize, Monitor - Integrated Construction Management

Our Differentiators

Proven Experience – Ground level expertise

Domain Expertise - Integrated Service Offering

✓ Active

We provide a seamless blend of advisory, engineering, project management, and dispute dispute support across the entire project lifecycle—from concept and feasibility to execution to execution and claims resolution.

 Experts with national & global experience of more than 1000 years

Digital-First & AI-Enabled Solutions

✓ Active

In-house digital platforms, web/mobile applications, and AI-driven tools tailored for infrastructure projects.

 5+ Projects implemented

Strong Commercial & Contractual Intelligence

✓ Active

deep expertise in contracts management, EOT analysis, claims, and arbitration support enables proactive risk identification and mitigation.

 50+ Projects supported in Claims & Disputes

Outcome-Driven Delivery Approach

✓ Active

Our focus goes beyond services - By combining domain expertise with practical execution strategies, we help clients achieve operational excellence.

 100% Client satisfaction
